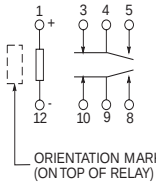
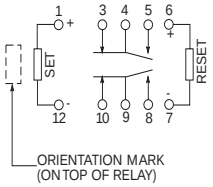
Single Coil Latching* and Single Coil Non-latching**



Dual Coil Latching***



Note: All diagrams shown in de-energized or reset position.

***Note:** For non-latching versions, coil polarity must be observed.

****Note:** For single coil latching versions, polarity shown results in "set" condition. Reverse polarity results in "reset" condition.

*****Note:** The contact position illustrated shows the reset condition. If a positve potential is applied to terminal 1 or 7, the relay adopts the set position.
